**EXAMINER'S AMENDMENT**

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

Cancel claims 14-21.

***Allowable Subject Matter***

2. Claims 1-11, 13, 22, and 23 are allowed.

3. The following is an examiner's statement of reasons for allowance:

The prior art, Humble (US 5,494,136), discloses a customer self-checkout system including a checkout station configured for self-checkout by customers of items for purchase, a plurality of supervisory terminals configured to conduct supervisory activities to administer the operation of the checkout station, and a controller operatively coupling the plurality of supervisory terminals to the checkout station, wherein the controller enables communication from the checkout station to multiple supervisory terminals and supervisory administration of the checkout station by multiple ones of the supervisory terminals.

The prior art fails to disclose a customer self-checkout system wherein the supervisory activities comprise a plurality of supervisory functions and wherein a first one of the supervisory terminals conduct supervisory activities consisting of a first subset of the supervisory functions and a second one of the supervisory terminals conduct supervisory activities consisting of a second subset of the supervisory functions, the first and second subsets of the supervisory functions being different, and wherein an arbitration function selects the supervisory terminal to perform the supervisory activity based on the subset into which the requested supervisory activity falls.

The limitations lacking in the prior art, in combination with the other limitations clearly claimed for patent, are novel and unobvious.

The non-patent literature, *Business Wire* article, discloses using a high-speed network to perform point of sale transactions in supermarkets and other venues that involves customer data validation.

The non-patent literature fails to disclose a customer self-checkout system wherein the supervisory activities comprise a plurality of supervisory functions and wherein a first one of the supervisory terminals conduct supervisory activities consisting of a first subset of the supervisory functions and a second one of the supervisory terminals conduct supervisory activities consisting of a second subset of the supervisory functions, the first and second subsets of the supervisory functions being different, and wherein an arbitration function selects the supervisory terminal to perform the

supervisory activity based on the subset into which the requested supervisory activity falls.

The limitations lacking in the prior art, in combination with the other limitations clearly claimed for patent, are novel and unobvious.

***Conclusion***

4. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
